The Social Construction of Reality

Ethics and Values in Social Work

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers. In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Structural Social Work

A high-energy philosophical manifesto on the concept and virtues of universal values addresses such topics as Heidegger’s engagement with the Third Reich, the role of class struggles in global capitalism, and the legacy of Christianity against New Age spiritualism. Original.

Innovation in Public Sector Services

In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In Black Feminist Thought, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

Black Feminist Thought

A new edition of Karl Mannheim’s classic work in which the concepts of ‘ideology’ and ‘utopia’ are examined as opposing and dominant societal influences.
Gender Ideologies and Military Labor Markets in the U.S.

Winner of the International Studies in Poverty Prize awarded by the Comparative Research Programme on Poverty (CROP) and Zed Books Poverty has become the central focus of global development efforts, with a vast body of research and funding dedicated to its alleviation. And yet, the field of poverty studies remains deeply ideological and has been used to justify wealth and power within the prevailing world order. Andrew Martin Fischer clarifies this deeply political character, from conceptions and measures of poverty through to their application as policies. Poverty as Ideology shows how our dominant approaches to poverty studies have, in fact, served to reinforce the prevailing neoliberal ideology while neglecting the wider interests of social justice that are fundamental to creating more equitable societies. Instead, our development policies have created a 'poverty industry' that obscures the dynamic reproductions of poverty within contemporary capitalist development and promotes segregation in the name of science and charity. Fischer argues that an effective and lasting solution to global poverty requires us to reorient our efforts away from current fixations on productivity and towards more equitable distributions of wealth and resources. This provocative work offers a radical new approach to understanding poverty based on a comprehensive and accessible critique of key concepts and research methods. It upends much of the received wisdom to provide an invaluable resource for students, teachers and researchers across the social sciences.

Resisting Novels Ideology and Fiction

This is a timely and important contribution on innovation processes within the public sector. Departing from the myth of private equal to entrepreneurial, public equal to bureaucratic paralysis, it offers precious insights into public sector learning, entrepreneurship, of course inertias, and also the trade-offs involved in different management philosophies and performance evaluation methods. It is a rare example of political economy done right. Giovanni Dosi, Sant Anna School of Advanced Studies, Pisa Innovation and entrepreneurship have become the cornerstones for economic growth, jobs and competitiveness in the global economy. However, the burden for generating an innovative economy has fallen on the private sector. Scholars have been remarkably taciturn concerning the role for innovation and entrepreneurship in the public sector has remained strikingly invisible. No more. In Innovation in Public Sector Services, the authors assemble a team of leading international scholars in a path breaking study to identify the potential for the public sector in contributing to innovation and entrepreneurship. In particular, the volume introduces an insightful new analytical framework that lays the foundations for transforming a sleepy public sector into a dynamic, innovative and highly effective partner for leadership and change in the global era. Scholars, policy makers and business leaders who think that the public sector is condemned to being a hindrance to innovation and entrepreneurship rather than a leader championing change and competitiveness in a global economy would be well advised to read this important new book. David B. Audretsch, Indiana University, Bloomington, US and WHU, Germany This groundbreaking book provides new key insights and opens up an important research agenda. The book develops a new taxonomy of the different types of innovation found in public sector services, and investigates the key features and drivers of public sector entrepreneurship. The book contains new statistical studies and a set of six international case studies in health and social services. The research shows that public sector organisations are important innovators in their own right. Economic growth and social development depend on efficient public sector organisations that deliver high quality services, are effectively organised, and have excellent interactions with the private sector, NGOs and citizens. Public sector innovation is complex, invariably involving changes in services, organisational structures, and managerial practices. Essential to successful innovation are the policy entrepreneurs and service entrepreneurs who develop, organise and manage new innovations. This book provides key lessons for these public sector entrepreneurs. Innovation in Public Sector Services fills a fundamental gap; explaining the dynamics of innovation and entrepreneurship in public sector services and is of great importance for researchers, academics and students interested in innovation, entrepreneurship and strategy management. It provides a stimulating read for anyone working or interested in health and social services.

Ideology and Utopia

Ideology and Utopia argues that ideologies are mental fictions whose function is to veil the true nature of a given society. They originate unconsciously in the minds of those who seek to stabilise a social order. Utopias are wish dreams that inspire the collective action of opposition groups which aim at the entire transformation of society. Mannheim shows these two opposing elements to dominate not only our social thought but even unexpectedly to penetrate into the most scientific theories in philosophy, history and the social sciences. This new edition contains a new preface by Bryan S. Turner which describes Mannheim's work and critically assesses its relevance to modern sociology. The book is published with a comprehensive bibliography of Mannheim's major works.
The Age of Social Democracy

This handbook provides a comprehensive view of the field of the sociology of gender. It presents the most important theories about gender and methods used to study gender, as well as extensive coverage of the latest research on gender in the most important areas of social life, including gendered bodies, sexuality, carework, paid labor, social movements, incarceration, migration, gendered violence, and others. Building from previous publications this handbook includes a vast array of chapters from leading researchers in the sociological study of gender. It synthesizes the diverse field of gender scholarship into a cohesive theoretical framework, gender structure theory, in order to position the specific contributions of each author/chapter as part of a complex and multidimensional gender structure. Through this organization of the handbook, readers do not only gain tremendous insight from each chapter, but they also attain a broader understanding of the way multiple gendered processes are interrelated and mutually constitutive. While the specific focus of the handbook is on gender, the chapters included in the volume also give significant attention to the interrelation of race, class, and other systems of stratification as they intersect and implicate gendered processes.

Research Methods in Social Work

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Structural Social Work

‘I would encourage undergraduates students to read it, for it does summarise well a classical Marxist analysis of social policy and welfare‘ - Social Policy The anti-capitalist movement is increasingly challenging the global hegemony of neo-liberalism. The arguments against the neo-liberal agenda are clearly articulated in Rethinking Welfare. The authors highlight the growing inequalities and decimation of state welfare, and use Marxist approaches to contemporary social policy to provide a defence of the welfare state. Divided into three main sections, the first part of this volume looks at the growth of inequality, and social and environmental degradation. Part Two centres on the authors' argument for the relevance of core Marxists concepts in aiding our understanding of social policy. This section includes Marxist approaches to a range of welfare issues, and their implications for studying welfare regimes and practices. Issues covered include: · Class and class struggle · Opression · Alienation and the family The last part of the book explores the question of globalization and the consequences of international neo-liberalism on indebted countries as well as the neo-liberal agenda of the Conservative and New Labour governments in Britain. The authors conclude with the prospect of an alternative welfare future which may form part of the challenge against global neo-liberalism.

Social Diagnosis

From the critique of ‘the medical model’ of disability undertaken during the early and mid-1990s, a ‘social model’ emerged, particularly in the caring professions and those trying to shape policy and practice for people with disability. In education and schooling, it was a period of cementing inclusive practices and the ‘integration’ and inclusion of disability into ‘mainstream’. What was lacking in the debates around the social model, however, were the challenges to abledness that were being grappled with in the routine and pragmatics of self-care by people with disabilities, their families, carers and caseworkers. Outside the academy, new forms of activity and new questions were circulating. Challenges to abledness flourished in the arts and constituted the lived experience of many disability activists. Disability Matters engages with the cultural politics of the body, exploring this fascinating and dynamic topic through the arts, teaching, research and varied encounters with ‘disability’ ranging from the very personal to the professional. Chapters in this collection are drawn from scholars responding in various registers and contexts to questions of disability, pedagogy, affect, sensation and education. Questions of embodiment, affect and disability are woven throughout these contributions, and the diverse ways in which these concepts appear emphasize both the utility of these ideas and the timeliness of their application. This book was originally published as a special issue of Discourse: Studies in the Cultural Politics of Education.

In Defense of Lost Causes
2011 Reprint of 1939 Edition. Parts I & III of “The German Ideology.” Full facsimile of the original edition, not reproduced with Optical Recognition Software. Originally published by the Marx-Engels Institute in Moscow in 1939. “The German Ideology” was written by Karl Marx and Friedrich Engels circa 1846, but published later. The original edition was divided into three parts. Part I, the most significant, is perhaps the classic statement of the Marxist theory of history and his much cited “materialist conception of history.” Since its first publication, Marxist scholars have found Part I “The German Ideology” particularly valuable since it is perhaps the most comprehensive statement of Marx’s theory of history stated at such length and detail. Part II consisted of many satirically written polemics against Bruno Bauer, other Young Hegelians, and Max Stirner. These polemical and highly partisan sections of the “German Ideology” have not been reproduced in this edition. We reprint Parts I & Parts III only. Part III treats Marx & Engels' conception of true socialism and is reprinted in its entirety. Part II has not been reprinted in this edition in order to produce a small and inexpensive book which contains the gist of the “German Ideology.” Appendix contains the “Theses on Feuerbach.” Index of authors, with scholarly citations and footnotes.

**Whiteshift**

**Postmodern War**

Analyzing Social Media Networks with NodeXL offers backgrounds in information studies, computer science, and sociology. This book is divided into three parts: analyzing social media, NodeXL tutorial, and social-media network analysis case studies. Part I provides background in the history and concepts of social media and social networks. Also included here is social network analysis, which flows from measuring, to mapping, and modeling collections of connections. The next part focuses on the detailed operation of the free and open-source NodeXL extension of Microsoft Excel, which is used in all exercises throughout this book. In the final part, each chapter presents one form of social media, such as e-mail, Twitter, Facebook, Flickr, and Youtube. In addition, there are descriptions of each system, the nature of networks when people interact, and types of analysis for identifying people, documents, groups, and events. Walks you through NodeXL, while explaining the theory and development behind each step, providing takeaways that can apply to any SNA Demonstrates how visual analytics research can be applied to SNA tools for the mass market Includes case studies from researchers who use NodeXL on popular networks like email, Facebook, Twitter, and wikis Download companion materials and resources at https://nodexl.codeplex.com/documentation

**Poverty as Ideology**

Don’t get lost in Research Methods--succeed in the class with RESEARCH METHODS IN SOCIAL WORK. This how-to book includes simplified, step-by-step instructions using real-world data and scenarios. Plus, it comes with updated tools that show you how to create a research project and write a thesis proposal. Every chapter comes with self-assessment sections so you can see for yourself how you’re doing and prepare effectively for the test.

**Disability Matters**

Laszlo traces the spectacular rise and spread of citrus across the globe, from southeast Asia in 4000 BC to modern Spain and Portugal, whose explorers introduced the fruit to the Americas. This book explores the numerous roles that citrus has played in agriculture, horticulture, cooking, nutrition, religion, and art.

**Handbook of Intergenerational Justice**

The need for an alternative to conventional social work is more obvious today than ever before. Given its acceptance of our present social order and its emphasis on reform of the individual and limited social reform, conventional social work appears powerless to deal with the increasing social problems that have already overloaded a diminishing welfare state. By continuing to recycle mainstream theories of social work practice that do nothing to change the present order, conventional social work actually contributes to the ideological hegemony of patriarchy, classism, racism and other oppressive thought structures. The New Structural
Social Work reveals the shortcoming of welfare capitalism as a social system and shows how conventional social work has failed to respond to systemic social problems. Mullaly presents a coherent and consistent theory of progressive social work, with oppression as its central focus, and examines elements of its political practice. It is shown how this practice is carried out within the social agency, outside the agency, and within the personal lives of structural social workers. This third edition has been extensively revised and updated, and includes: DT an expanded discussion of the political paradigms that influence social work in Canada a new chapter on feminist, antiracist, and postmodernist critiques of the neo-conservative, liberal, social democratic, and Marxist paradigms that dominated the nineteenth and twentieth centuries DT a new chapter that assesses the influence of the 'Third Way' and the role that social work plays in Third Way jurisdictions such as the UK. DT improved pedagogical aids to make this book more accessible to the mid-level university market. Package Contains: 9780195419061 New Structural Social Work 9780195433586 Documentation Guide for the Social Sciences

**Anti Oppressive Social Work Theory and Practice**

An up-to-date and thorough investigation of progressive social work theory. This fully updated edition explores the shortcomings of welfare capitalism and reveals how conventional social work fails to respond to systemic social problems. By presenting a coherent theory of progressive social work with oppression as its focus, this text shows how students can incorporate a radical alternative to conventional social work within their own practice.

**Critical Ethnography**

Bringing together international case studies, this book offers theoretical and empirical insights into the interaction between social work and social policy. Moving beyond existing studies on policy practice, the book employs the policy cycle as a core analytical frame and focuses on the influence of social work(ers) in the problem definition, agenda setting, policy formulation and implementation of social policy. Twenty-three contributors offer examples of policy making from seven different countries and demonstrate how social work practitioners can become political actors, while also encouraging policy makers to become aware of the potential of social work for the social policy-making process.

**States and Social Revolutions**

Social work ethics provide practitioners with guidance on how to promote social work values such as respect, social justice, human relationships, service, competence, and integrity. Students entering the profession need to develop a real-world understanding of how to apply these values in practice while also managing the dilemmas that arise when social workers, clients, and others encounter conflicting values and ethical obligations. Ethics and Values in Social Work offers a comprehensive set of teaching and learning materials to help students develop the knowledge, self-awareness, and critical thinking skills required to handle values and ethical issues in all levels of practice--individual, family, group, organization, community, and social policy. BSW and MSW students will particularly appreciate how complex ethical obligations and theories have been translated into plain language. Additionally, the comprehensive set of case examples and exercises provides realistic scenarios to develop critical thinking and problem solving skills across a range of practice situations.

**Citrus**

With a new Introduction to this touching homage to his mother, the author paints a portrait of growing up in a black neighborhood as the child of an interracial marriage. Although raised an Orthodox Jew in the South, McBride's mother abandoned her heritage, moved to Harlem, and married a black man.

Using concrete examples, this optimistic book illustrates the ways in which structural social work theory is being successfully implemented in social work practice. By providing examples of what does work in structural social work practice, it offers hope to others that this work is not only possible, but that it is happening.
effective, and the rest of us can do it too.

**Social Work and the Making of Social Policy**

This book, by one of the leading theorists of social work, tackles a subject of crucial importance to students and practitioners alike: how social workers can enable their clients to challenge and transcend the manifold oppressions that disempower them (whether through poverty, disability, mental illness, etc.). It moves from a discussion of social work’s purpose and ambitions to an exposition of theory and, from there, to the practice arenas of working with individuals, in groups, within organisations, and within a wider social and political context.

**The German Ideology**

This is the history of how two countries on the northern edge of Europe built societies in the twentieth century that became objects of inspiration and envy around the world. Francis Sejersted, one of Scandinavia’s leading historians, tells how Norway and Sweden achieved a rare feat by realizing grand visions of societies that combine stability, prosperity, and social welfare. It is a history that holds many valuable lessons today, at a time of renewed interest in the Scandinavian model. The book tells the story of social democracy from the separation of Norway and Sweden in 1905 through the end of the century, tracing its development from revolutionary beginnings through postwar triumph, as it became a hegemonic social order that left its stamp on every sector of society, the economy, welfare, culture, education, and family. The book also tells how in the 1980s, partly in reaction to the strong state, a freedom and rights revolution led to a partial erosion of social democracy. Yet despite the fracturing of consensus and the many economic and social challenges facing Norway and Sweden today, the achievement of their welfare states remains largely intact.

**Structural Social Work in Action**

Whiteshift: the turbulent journey from a world of racially homogeneous white majorities to one of racially hybrid majorities This is the century of whiteshift. As Western societies are becoming increasingly mixed-race, demographic change is transforming politics. Over half of American babies are non-white, and by the end of the century, minorities and those of mixed race are projected to form the majority in the UK and other countries. The early stages of this transformation have led to a populist disruption, tearing a path through the usual politics of left and right. Ethnic transformation will continue, but conservative whites are unlikely to exit quietly; their feelings of alienation are already redrawing political lines and convulsing societies across the West. One of the most crucial challenges of our time is to enable conservatives as well as cosmopolitans to view whiteshift as a positive development. In this groundbreaking book, political scientist Eric Kaufmann examines the evidence to explore ethnic change in North American and Western Europe. Tracing four ways of dealing with this transformation—fight, repress, flight, and join—he charts different scenarios and calls for us to move beyond empty talk about national identity. If we want to avoid more radical political divisions, he argues, we have to open up debate about the future of white majorities. Deeply thought provoking, enriched with illustrative stories, and drawing on detailed and extraordinary survey, demographic, and electoral data, Whiteshift will redefine the way we discuss race in the twenty-first century.

**The Color of Water**

Featuring an interdisciplinary, developmental, ecological-systems framework, Human Behavior for Social Work Practice, Third Edition helps students implement a consistent system through which to approach multifaceted social issues in any environment. Students will learn that by effectively connecting theory to practice, they can develop successful strategies to use as they encounter complex issues currently facing social workers, whether it be in inner city schools or rural nursing homes with individuals of different ages, ethnicities, and socioeconomic status. This text examines social work issues at various points in human development using specific programs and policies to illustrate developmentally- and culturally-sensitive social work practice. Excerpts from interviews with practicing social workers highlight real-life experiences and introduce a variety of policy contexts. Part 3 of the text focuses on social work issues affecting individuals across the lifespan and around the globe through chapters on disability and stigmatization; race, racism and resistance; women and gender; and terrorism.
Analyzing Social Media Networks with NodeXL

Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualize these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.

Human Behavior for Social Work Practice

The contributors to this volume undertake to establish the foundations and definitions of intergenerational justice and to explore its capacity to guide us in policy and public opinion judgments we must make to face unprecedented issues. . . We are changing the biosphere and using resources to an extent never contemplated in the history of ethics. Deterioration of our oceans, loss of topsoil, insecurity about potable water supplies, the ozone hole, global warming, and the question about how to handle high-level nuclear waste which remains lethal perhaps 400,000 years from now, are some examples whose consequences reach far beyond inherited principles and policies of responsibility to others. This Handbook works to open a path for debate, extension of our tradition and invention of new thinking on these issues. Craig Walton, University of Nevada, Las Vegas, US More than a Handbook, this collection is a landmark work showing the way to a new ethics of intergenerational responsibility. It raises, in the most comprehensive way, the overarching ethical questions of our time, What are the rights of future generations? and How might present generations establish a philosophical foundation for its responsibilities to generations to come? . Peter Blaze Corcoran, Center for Environmental and Sustainability Education, Florida Gulf Coast University, US This important book provides a rich menu of history, current theory, and future directions in constitutional law, philosophy of rights and justice, and the relations of economics and politics to time, institutions, and the common good. It is enlivened by back-and-forth discussions among the authors (including some disagreements), as well as by applications to important contemporary issues such as climate change, nuclear waste, and public debt. Theoretic considerations are nicely balanced with examples of the means adopted in a number of countries to establish a legal foundation for protection of the quality of life for future generations. Neva Goodwin, Tufts University, US Do we owe the future anything? If so, what and why? Our capacity to affect the lives of future generations is greater than ever before, but what principles should regulate our relationship with people who don't yet exist? This Handbook offers a comprehensive survey of the key debates and pathbreaking accounts of potential ways forward both ethical and institutional. Andrew Dobson, The Open University, UK This Handbook provides a detailed overview of various issues related to intergenerational justice. Comprising articles written by a distinguished group of scholars from the international scientific community, the Handbook is divided into two main thematic sections foundations and definitions of intergenerational justice and institutionalization of intergenerational justice. The first part clarifies basic terms and traces back the origins of the idea of intergenerational justice. It also focuses on the problem of intergenerational buck-passing in the ecological context; for example in relation to nuclear waste and the greenhouse effect. At the same time, it also sheds light on the relationship between intergenerational justice and economics, addressing issues such as public debt and financial sustainability. The innovative second part of the volume highlights how posterity can be institutionally protected, such as by inserting relevant clauses into national constitutions. Reading this volume is the best way to gain an overall knowledge of intergenerational justice an extremely salient and topical issue of our time. The Handbook is an important contribution to the literature and will be of great interest to academics and graduate students as well as readers interested in wider human rights issues.

Mythologies

The need for an alternative to conventional social work is more obvious today than ever before. Given its acceptance of our present social order and its emphasis on reform of the individual and limited social reform, conventional social work appears powerless to deal with the increasing social problems that have already overloaded a diminishing welfare state. By continuing to recycle mainstream theories of social work practice that do nothing to change the present order, conventional social work actually contributes to the ideological hegemony of patriarchy, classism, racism and other oppressive thought structures. The New Structural Social Work reveals
the shortcoming of welfare capitalism as a social system and shows how conventional social work has failed to respond to systemic social problems. Mullaly presents a coherent and consistent theory of progressive social work, with oppression as its central focus, and examines elements of its political practice. It is shown how this practice is carried out within the social agency, outside the agency, and within the personal lives of structural social workers. This third edition has been extensively revised and updated, and includes: an expanded discussion of the political paradigms that influence social work in Canada; a new chapter on feminist, antiracist, and postmodernist critiques of the neo-conservative, liberal, social democratic, and Marxist paradigms that dominated the nineteenth and twentieth centuries; a new chapter that assesses the influence of the 'Third Way' and the role that social work plays in Third Way jurisdictions such as the UK; improved pedagogical aids to make this book more accessible to the mid-level university market.

**When Professionals Weep**

Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America’s key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In The Politics Industry, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. The Politics Industry is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

**Handbook of the Sociology of Gender**

Critical Ethnography presents a fresh new look at critical ethnography by emphasizing the significance of ethics and performance in the art and politics of fieldwork. The book explores an ethics of ethnography while illustrating the relevance of performance ethnography across disciplinary boundaries. The productive links between theory and method are celebrated in this text. Theoretical concepts range from queer theory, feminist theory, and critical race theory to Marxism and phenomenology. The methodological techniques range from designing and asking in-depth interview questions and developing rapport to coding and interpreting data.

**Rethinking Welfare**

When Professionals Weep speaks to the humbling and often transformational moments that clinicians experience in their careers as caregivers and healers—moments when it is often hard to separate the influence of our own emotional responses and worldviews from the patient’s or family’s. When Professionals Weep addresses these poignant moments—when the professional's personal experiences with trauma, illness, death, and loss can subtly, often stealthily, surface and affect the helping process. This edition, like the first, both validates clinicians’ experiences and also helps them process and productively address compassion fatigue, burnout, and secondary traumatic stress. New material in the second edition includes increased emphasis on the burgeoning fields of hospice and palliative care, organizational countertransference, mindfulness, and compassionate practice. It includes thought-provoking cases, self-assessments, and exercises that can be used on an individual, dyadic, or group basis. This volume is an invaluable handbook for practitioners in the fields of medicine, mental health, social work, nursing, chaplaincy, the allied health sciences, psychology, and psychiatry.

**Ideology and Utopia**
The New Structural Social Work

One of the most important texts of modern times, Herbert Marcuse's analysis and image of a one-dimensional man in a one-dimensional society has shaped many young radicals' way of seeing and experiencing life. Published in 1964, it fast became an ideological bible for the emergent New Left. As Douglas Kellner notes in his introduction, Marcuse's greatest work was a 'damning indictment of contemporary Western societies, capitalist and communist.' Yet it also expressed the hopes of a radical philosopher that human freedom and happiness could be greatly expanded beyond the regimented thought and behaviour prevalent in established society. For those who held the reins of power Marcuse's call to arms threatened civilization to its very core. For many others however, it represented a freedom hitherto unimaginable.

One-Dimensional Man

The Politics Industry

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Structure of Scientific Revolutions

State structures, international forces, and class relations: Theda Skocpol shows how all three combine to explain the origins and accomplishments of social-revolutionary transformations. Social revolutions have been rare but undeniably of enormous importance in modern world history. States and Social Revolutions provides a new frame of reference for analyzing the causes, the conflicts, and the outcomes of such revolutions. It develops a rigorous, comparative historical analysis of three major cases: the French Revolution of 1787 through the early 1800s, the Russian Revolution of 1917 through the 1930s, and the Chinese Revolution of 1911 through the 1960s. Believing that existing theories of revolution, both Marxist and non-Marxist, are inadequate to explain the actual historical patterns of revolutions, Skocpol urges us to adopt fresh perspectives. Above all, she maintains that states conceived as administrative and coercive organizations potentially autonomous from class controls and interests must be made central to explanations of revolutions.

Pedagogical Quality in Preschool

Drawing on both sociological and anthropological perspectives, this volume explores cross-national trends and everyday experiences of ‘parenting’. Parenting in Global Perspective examines the significance of ‘parenting’ as a subject of professional expertise, and activity in which adults are increasingly expected to be emotionally absorbed and become personally fulfilled. By focusing the significance of parenting as a form of relationship and as mediated by family relationships across time and space, the book explores the points of accommodation and points of tension between parenting as defined by professionals, and those experienced by parents themselves. Specific themes include: the ways in which the moral context for parenting is negotiated and sustained the structural constraints to ‘good’ parenting (particularly in cases of immigration or reproductive technologies) the relationship between intimate family life and broader cultural trends, parenting culture, policy making and nationhood parenting and/as adult ‘identity-work’. Including contributions on parenting from a range of ethnographic locales – from Europe, Canada and the US, to non-Euro-American settings such as Turkey, Chile and Brazil, this volume presents a uniquely critical and international perspective, which
positions parenting as a global ideology that intersects in a variety of ways with the political, social, cultural, and economic positions of parents and families.

Parenting in Global Perspective
