This collection of papers presents a reformist project calling upon Muslim intellectuals and scholars everywhere to comprehend the vast breadth and depth of the crisis engulfing Muslim thought today and the necessity of solving this crisis to enable the Ummah to experience a revival and fulfill its role among the nations of the world. The reader will find a variety of articles dealing with this intellectual crises, these include a chapter on ijtihad's role and history, important since our intellectual problems cannot be solved without the scholars' use of independent reasoning and creativity. Another discusses imitation (taqlid) calling upon Muslim scholars and intellectuals to abandon imitation and to stop favoring the past over the present when trying to solve modern problems. Another looks at human rights.

The Islamization of Knowledge

The film Hero, directed by Zhang Yimou and released in 2002, is widely regarded as the first globally successful indigenous Chinese blockbuster. A big expensive film with multiple stars, spectacular scenery, and astonishing action sequences, it touched on key questions of Chinese culture, nation and politics, and was both a domestic sensation and an international hit. This book explores the reasons for the film's popularity with its audiences, discussing the factors which so resonated with those who watched the film. It examines questions such as Chinese national unity, the search for cultural identity and role models from China’s illustrious pre-communist past, and the portrayal of political and aesthetic values, and attitudes to gender, sex, love, and violence which are relatively new to China. The book demonstrates how the film, and China’s growing film industry more generally, have in fact very strong international connections, with Western as well as Chinese financing, stars recruited from the East Asian region more widely, and extensive interactions between Hollywood and Asian artists and technicians. Overall, the book provides fascinating insights into recent developments in Chinese society, popular culture and cultural production.

SUPERANNO The science of complexity has revolutionized our understanding of everything from the brain to the economy to the weather. This reference shows how it can change the way we approach our most persistent social problems by introducing key concepts like emergence, self-organization, and networks, then using them to propose novel solutions to problems in health care, education, terrorism, and third-world development. Suitable for anyone struggling to cope with complex challenges. Original.

Master Techniques in Blepharoplasty and Periorbital Rejuvenation

The thoroughly revised Sixth Edition of this classic reference on ocular disease is the perfect guide for all clinicians who treat eye disorders. Written in a concise outline format, this quick reference is perfect for diagnosis and management of hundreds of ocular conditions. This pocket-size manual covers - from symptoms to treatment - all ocular disorders likely to be encountered in the office, emergency room, or hospital setting.

Transnational Stardom

This paper offers a number of valuable insights gained from a long engagement with Islamic as well as global issues, with traditional as well as contemporary concerns. It not only surveys the field along with the powers and challenges at work, but also charts a way out of the present impasse. More immediately, it offers an updated review of the progress of the Islamization of Knowledge project and a timely clarification of the very concept itself. Clearly, that concept, though responsible for generating worldwide debate and action, has been so often misinterpreted and/or inflated. The gradational nature of the Islamizing project is all too obvious, and was never far from the minds of the authors of the 1982 declaration. It would certainly have been juvenile to think otherwise. And yet there is a need now to stress, as the present paper does, the ambitious (but also imperative) nature of the enterprise. For, despite the highly commendable effort invested in further elaboration and, in some brave instances, attempted implementation of the concept, the process of the Islamization of Knowledge remains at an intial, some might even say, prenatal stage. Much work needs to be done, many talents galvanized and resources pooled, institutions set up or reorganized, etc., before a truly genuine and sustainable realization of the concept can be said to have begun. Such a realistic vision needs to accompany and inform every stage of the way. To be lulled into a false or premature sense of achievement is a costly setback at a time when standing idly by for a day may have serious consequences for decades to come.

Many stars from China, Japan and Korea are the most popular and instantly recognizable in the world. East Asian Film Stars brings together some of the world's leading cinema scholars to offer their insights into the work of regional and transnational screen legends, contemporary superstars and mysterious cult personas.
Tens of thousands of American adults join the Catholic Church every year. Why? What is it that attracts them to Catholicism? In Confessions of a Mega-Church Pastor, Allen Hunt unveils the treasures of Catholicism that many life-long Catholics are simply unaware of. At the same time he demonstrates the genius of Catholicism and encourages us to move beyond taking our faith for granted. With a personal touch that is profound and disarming, Hunt takes his readers on a journey that is sure to change the way we experience our faith. At a time when so many are disillusioned about where the Catholic Church is and where it is going, Allen Hunt brilliantly reminds us that personal holiness is the key to the bigger future God wants to lead us to both as individuals and together as a Church.

**Corneal physiopathology**

For the first time, Muslims are faced with a worldwide positivism which is working to use knowledge, the sciences and their discoveries and achievements in a manner which severs the relationship between the Creator, the created universe and man, thereby disregarding the world of the unseen and driving a wedge between science and values. Lacking even the most modest store of vital Islamic doctrine on the intellectual level, university students and researchers in the Islamic world are confronted with doctrines and philosophies which are presented to them together with a flimsy, miserable defense of Islam. There is not a single academic institution in the Islamic world in which Islamic thought is taught and in which the Islamic vision is given a deep-rooted foundation with the same force and persuasiveness with which Western ideas and the Western vision are taught to students in the West, in a coherent, comprehensive manner accompanied by seriousness and commitment on the part of all. The books argues that this approach is diametrically opposed to the Islamic perspective and that we must disengage human scientific achievement from positivistic philosophical premises and reemploy these sciences within a systematic epistemological framework based on divine revelation, conferring honor upon all forms of knowledge, as having been bestowed upon man by their Creator.

Nearly seven million Muslims live in the United States today, and their relations with non-Muslims are strained. Many Americans associate Islam with figures such as Osama bin Laden, and they worry about "homegrown terrorists." To shed light on this increasingly important religious group and counter mutual distrust, renowned scholar Akbar Ahmed conducted the most comprehensive study to date of the American Muslim community. Journey into America explores and documents how Muslims are fitting into U.S. society, placing their experience within the larger context of American identity. This eye-opening book also offers a fresh and insightful perspective on American history and society. Following up on his critically acclaimed Journey into Islam: The Crisis of Globalization (Brookings, 2007), Ahmed and his team of young researchers traveled for a year through more than seventy-five cities across the United States—from New York City to Salt Lake City; from Las Vegas to Miami; from the large Muslim enclave in Dearborn, Michigan, to small, predominantly white towns like Arab, Alabama. They visited homes, schools, and over one hundred mosques to discover what
Muslims are thinking and how they are living every day in America. In this unprecedented exploration of American Muslim communities, Ahmed asked challenging questions: Can we expect an increase in homegrown terrorism? How do American Muslims of Arab descent differ from those of other origins (for example, Somalia or South Asia)? Why are so many white women converting to Islam? How can a Muslim become accepted fully as an "American," and what does that mean? He also delves into the potentially sticky area of relations with other religions. For example, is there truly a deep divide between Muslims and Jews in America? And how well do Muslims get along with other religious groups, such as Mormons in Utah? Journey into America is equal parts anthropological research, listening tour, and travelogue. Whereas Ahmed's previous book took the reader into homes, schools, and mosques in the Muslim world, his new quest takes us into the heart of America and its Muslim communities. It is absolutely essential reading for anyone trying to make sense of America today.

This book offers an essential guide to surgical approaches to the umbilicus. The navel is the only natural scar in the body, accepted for all human beings all over the world. Its absence or distortions can have negative psychological impacts, as it normally lends beauty and harmony to the otherwise unattractive abdomen. The aesthetic importance of the navel justifies the increasing amount of individuals undergoing abdominoplasty and omphaloplasty. However, these surgeries may lead to a series of complications or unintended aesthetic outcomes. Indeed, the postsurgical final aspect of the umbilicus is the main stigma and primary source of problems and complaints following abdominoplasty. In this book readers will find a complete surgical guide to the most important surgical approaches and strategies related to the navel, helping them to deliver a high standard of quality and patient-tailored surgical and aesthetic outcomes. Written by a renowned plastic surgeons with more than 20 years of experience, Omphaloplasty - A Surgical Guide of the Umbilicus offers readers an overview of general and innovative surgical techniques for the umbilicus, helping them to make the best choice when performing abdominoplasties.
